Que-Products welcomes Rodge Brooks as Sr. Application Engineer

(Decatur Illinois) March 16, 2009, - Helping customers apply QP series compressors to achieve maximum durability and optimized performance will be Rodge's primary roll at QUE-Products. Rodge is a graduate from Texas Tech University who worked as an HVAC system design engineer at ARA, Wynn's and Bergstrom Inc. The past 12 years Rodge served as both Application Engineer and Sales Manager at Sanden Int. Rodge's broad based experience as a HVAC system/component designer provides a unique skill set our customers can access to improve overall performance and minimize life cycle costs.

Rodge will be based in QUE-Products Frisco Texas office and can be reached at rbrooks@que-products.com.

QUE PRODUCTS, LLC. Is The Global supplier of quality air conditioning compressors and related products for the mobile air conditioning and refrigeration OEM and aftermarket industries. As an affiliate of TCCI, QUE Products is backed by a 50 year tradition of excellence, with a USA based laboratory dedicated to providing a team of top engineers and expansive testing facilities to insure you the finest quality. QUE products offers a wide variety of quality air conditioning compressors for automotive, bus, heavy duty truck, off-road, military and R404a refrigeration applications.
